EXCEPTIONAL CUTTING CAPABILITIES

PROCUT CUTTER FOR HIGH QUALITY SILAGE OR CHOPPED STRAW, MF 2233 TO MF 2234 XD BALERS CAN BE FACTORY FITTED WITH A HEAVY-DUTY CUTTER UNIT.

ProCut chops the crop to your required length and the packer tines ensure high capacity crop transition into the pre-compression chamber. The packer system ensures consistent flake formation producing perfect bale shape regardless of windrow shape and density.

The MF 2233 has a cutter with 17 knives, whilst the MF 2224, MF 2234 and MF 2234 XD all have 26 knives. The knives are arranged in two banks which can be simply engaged and disengaged from the cab using the FieldStar 5 baler terminal and spool valve. All knives engaged gives a chop length of 43.5 mm and with a single knife-bank engaged 87 mm.

Each bank of knives is protected by hydraulic accumulators that provide a very responsive safety system should a foreign object enter the cutting area.

TWIN KNIFE-BANKS SIMPLY ENGAGED FROM THE CAB, OFFERING AVERAGE CHOP LENGTH OF 43.5 mm & 87 mm

▲ High speed, large diameter, serviceable rotor with replaceable finger sections

▲ Ample accessibility offering straightforward knife removal

▲ Precision cutting from the new ProCut heavy duty knives

ProCut benefits:

- ▶ Huge capacity from the ProCut rotor
- ▶ The new three row rotor finger design ensures high quality cutting with reduced power consumption
- ▶ Finer chopped material from the 43.5 mm knife spacing
- ▶ Highly responsive hydraulic twin knife-bank protection
